quirement engineering

Profile

Freelance full stack developer based in Roermond, Netherlands. TypeScript (React/Vue/NestJs) and PHP (Laravel/Symfony) across web apps, APIs and CMS platforms, with a track record of leading development squads and modernizing legacy systems.

Work Experience

Leff Design / Fullstack Developer (Owner)

Aug 2025 – Present

Roermond

Freelance full stack work across several client projects, based in Roermond.

Own projects

- **qaikprompt.com**: A visual AI prompt builder, a tool to build AI prompt flows, including admin and user dashboard (NestJs, React, TypeScript) (*soon online*)
- **qaikpost.com**: AI post generator API for content management systems like WordPress, Shopify etc., including a PHP plugin (NestJs, React, TypeScript) (*soon online*)
- **Laravel Resources to TypeScript Types**: Composer package that converts Laravel Resources to TypeScript types

Client projects

- **Biesbosch Vaantje**: Developed and implemented new admin features for the platform Biesbosch Vaantje (Laravel, Vue)
- **BerkhofEnterprises**: AI tool for publishing vacancies (TypeScript/NestJs, React)
- **therefilllabel.com**: Laravel (Livewire & VueJs) webshop including an admin dashboard with Stripe and PostNL integration
- **healthyproteins.nl**: Branding website for a healthy protein company including CMS (Laravel, Vue, Inertia)
- **Maastricht University Campus Tour**: Interactive campus tour website for Maastricht University.

Technical: NestJs, React, TypeScript, Laravel, Vue, Google Cloud, Kubernetes

Veldsink & VCN / Lead Developer (Freelance)

Mar 2023 – Jul 2025

Nuenen · <https://www.vcn.nl>

Led a development squad within a large-scale insurance software project, working with Docker-based environments, CI/CD pipelines and tools like Git, Bitbucket, JIRA and Confluence. Designed and implemented microservice REST APIs (Symfony) and built and maintained REST APIs and a TypeScript/React frontend admin dashboard.

- **Insurance Process Automation**: Developed and maintained proprietary software automating the complete insurance process within internal systems.
- **Microservices Refactor**: Refactored a large monolith into 20+ microservices while ensuring stability of the legacy application (Symfony).
- **Admin Dashboard**: Built and maintained a TypeScript/React frontend admin dashboard.

Technical: PHP, SQL, Symfony, ReactJs, TypeScript, Docker, Redis, ElasticSearch, Kafka
